THIS BRIEF SUMMARY OF WYOMING'S TITLE I PROJECTS REPORTS THAT USING SUBPROFESSIONAL TEACHER AIDES WAS THE MOST EFFECTIVE APPROACH FOR TEACHING THE DISADVANTAGED AT ALL GRADE LEVELS. THE AIDES ENABLED TEACHERS TO WORK WITH SMALL GROUPS AND TO GIVE MAXIMUM INDIVIDUAL ATTENTION. THREE PROJECTS WERE SUCCESSFUL WITH DEVELOPMENTAL READING IN INSTITUTIONS FOR NEGLECTED AND DELINQUENT CHILDREN. IN PREPARATION FOR CONDUCTING NEXT SUMMER'S CENTERS FOR CHILDREN OF MIGRANT AGRICULTURAL WORKERS, AN INSERVICE WORKSHOP WAS HELD AT THE UNIVERSITY OF WYOMING FOR TEACHERS OF MIGRANT CHILDREN. OUTLINES ARE GIVEN OF THE THREE MOST EFFECTIVE PROJECTS--"SCHOOL PSYCHOLOGICAL AND REMEDIAL SERVICE," "INDIVIDUALIZED INSTRUCTION FOR HIGH SCHOOL STUDENTS," AND "IMPROVEMENT OF EDUCATIONAL ATTITUDES AND SELF CONCEPTS." IN A SEPARATE DOCUMENT PROJECTS THROUGHOUT THE STATE ARE SUMMARIZED IN TABLES AND CHARTS. (AF)

TITLE I, ESEA, "STATE HIGHLIGHTS"
1966-1967

The School Districts and Institutions in Wyoming have been able to make strides in education under Title I, ESEA, in 1966/1967 which were not thought possible before the availability of federal funds.

Kindergarten, developmental reading, developmental mathematics and science, elementary guidance, health fitness, in-service training, teacher aides, field trips, etc., have been desired by many School Districts for years, but denied them due to insufficient funds.

UD 004 644

The most effective projects are:

LANDER "School Psychological and Remedial Service"

A clinical psychologist, a speech pathologist, 3 nurses and 2 teachers for the handicapped were hired to identify and work with children with special needs. After the child was identified to the teacher and parent, close cooperation among all staff resulted in giving the child individual attention, motivation and confidence. Involved were 1843 children at a cost of $9.75 per child.

CASPER "Individualized Instruction for High School Students"

Pilot classes composed of 15 to 20 students moved as a unit through their daily schedule, through experimental materials, flexibility of schedules, individualized instruction, field trips and cultural experiences. There was a desirable improvement in students' comprehension, attitudes, expectations of success, emotional and social stability, plus a decrease in dropout rate. Additional staff employed to complete the project was one and one-half. There were 660 students involved at a cost of $34.86 each.

CHEYENNE "Improvement of Educational Attitudes and Self Concepts"

A total of 28 elementary teachers, 8 teacher aides, 2 counselors, 1 nurse and 3 supervisors offered 1276 children in grades 1--6, art, cultural enrichment (general), English language arts, reading, mathematics, music, physical education and recreation, health (food, dental and physical), psychological-service, social work (parents), after school tutoring and field trips. The project offered flexible, less structured, creative, individualized instruction. It gave each child an opportunity to excel in some phase of school work and experience success for the first time. The most significant change was in the parents' and pupils' attitudes toward school. This was accomplished at a cost of $124.60 per pupil.

The most effective approach reported at all grade levels for teaching the deprived is the use of sub-professional aides, with teachers working with small groups, giving the most individual attention possible.

Wyoming had three successful projects involving developmental reading in Institutions for neglected and delinquent children. An in-service workshop was held at the University of Wyoming for teachers of migrant children this past summer. These teachers will be used as the nucleus for our designated centers next summer for the children of migrant agricultural workers.

Involved in Title I, ESEA, Wyoming projects for 1966/1967 were:

52	School Districts
176	Classroom teachers
79	Professionals (others)
124	Non-professionals
16,109	Public school children
656	Non-public school children
